

ESLAM AYMAN

Frontend Web Developer | React.js Specialist

Cairo, Egypt | 01068078245 | eslamayman2412@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Web Developer with a Bachelor's degree in Computer Science and hands-on project experience building responsive, production-quality interfaces with React.js, JavaScript (ES6+), and modern CSS frameworks. Skilled in translating designs into reusable, maintainable component architectures and integrating REST APIs for dynamic, data-driven applications. Strong foundation in data structures, algorithms, and Docker-based containerization, with a track record of delivering functional applications across multiple software projects spanning full-stack development and machine learning.

EDUCATION

Bachelor of Computer Science and Information Systems

Sep 2020 – Jun 2024

Helwan University, Faculty of Computer Science & Information Systems, Cairo, Egypt

- Cumulative GPA:** 3.01 / 4.00 (Very Good)
- Relevant Coursework:** Software Engineering, Database Management Systems, Advanced Web Development, Data Structures & Algorithms, Operating Systems

Languages: Arabic (Native), English (Professional Working Proficiency – B2)

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), HTML5, CSS3, SQL, Python.
- Frontend:** React.js, Vite, Tailwind CSS, Bootstrap, Responsive & Mobile-First Design, State Management (React Hooks, Context API).
- Backend & APIs:** REST API Integration, Node.js (Basic).
- Tools & DevOps:** Git, GitHub, Docker, VS Code, Agile/Team Collaboration.
- Core CS Concepts:** Data Structures & Algorithms, OOP, Software Design, Problem Solving.

PROJECTS

Bus Booking Web Application

React.js · Node.js · REST APIs | Team Project | [GitHub Repository](#)

- Collaborated with a development team to build a full-stack bus booking application.
- Developed reusable React.js components to create a responsive and maintainable user interface.
- Built responsive pages using Bootstrap and CSS3, ensuring compatibility across desktop and mobile devices.
- Integrated REST APIs with the frontend using Fetch API to support user authentication, bus search, and seat booking.
- Used Git and GitHub for version control and team collaboration.

Handwritten Text Recognition (HTR) System — Graduation Project

Python · Machine Learning · OpenCV | Team Project | [GitHub Repository](#)

- Co-developed an offline handwriting recognition engine in Python, enabling accurate text extraction from scanned image inputs without cloud dependency.
- Designed an OpenCV-based image preprocessing pipeline (noise reduction, contrast enhancement) that improved input clarity prior to model inference.
- Trained and evaluated machine learning classification models, iterating on feature selection to increase character recognition accuracy.

Personal Portfolio Website

React.js · Tailwind CSS · Vite · Git | [GitHub Repository](#) | [Live Demo](#)

- Designed and developed a responsive portfolio using React.js and Tailwind CSS.
- Showcases projects, technical skills, and contact information.
- Deployed using Vercel with a modern, mobile-first design.

EXPERIENCE

Frontend Developer — Personal & Team Projects

Sep 2020 – Present

Helwan University, Cairo, Egypt

- Developed multiple responsive React.js applications independently and in small teams, applying component-based architecture and modern JavaScript practices.
- Collaborated using Git/GitHub with version control best practices, including branching and code review, across all academic projects.
- Applied core software engineering and database management principles from coursework to structure and debug full-stack applications.
