

# ESLAM AYMAN

## Frontend Web Developer | React.js Specialist

📍 Cairo, Egypt | 📞 01068078245 | ✉️ [eslamayman2412@gmail.com](mailto:eslamayman2412@gmail.com) | 🔗 [linkedin.com/in/eslam-ayman-0b550527b](https://linkedin.com/in/eslam-ayman-0b550527b) | 🌐 [Portfolio](#) | 📁 [GitHub](#)

### PROFESSIONAL SUMMARY

Frontend Web Developer with a Bachelor's degree in Computer Science and hands-on project experience building responsive, production-quality interfaces with React.js, JavaScript (ES6+), and modern CSS frameworks. Skilled in translating designs into reusable, maintainable component architectures and integrating REST APIs for dynamic, data-driven applications. Strong foundation in data structures, algorithms, and Docker-based containerization, with a track record of delivering functional applications across multiple software projects spanning full-stack development and machine learning.

### EDUCATION

#### Bachelor of Computer Science and Information Systems

Sep 2020 – Jun 2024

Helwan University, Faculty of Computer Science & Information Systems, Cairo, Egypt

- **Cumulative GPA:** 3.01 / 4.00 (Very Good)
- **Relevant Coursework:** Software Engineering, Database Management Systems, Advanced Web Development, Data Structures & Algorithms, Operating Systems

**Languages:** Arabic (Native), English (Professional Working Proficiency – B2).

### TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, SQL, Python.
- **Frontend:** React.js, Vite, Tailwind CSS, Bootstrap, Responsive & Mobile-First Design, State Management (React Hooks, Context API).
- **Backend & APIs:** REST API Integration, Node.js (Basic).
- **Tools & DevOps:** Git, GitHub, Docker, VS Code, Agile/Team Collaboration, Vercel (CI/CD deployment).
- **Core CS Concepts:** Data Structures & Algorithms, OOP, Software Design, Problem Solving.

### PROJECTS

#### Bus Booking Web Application

Feb 2020 – May 2024

React.js · Node.js · REST APIs | Team Project | [GitHub Repository](#)

- Collaborated with a development team to build a full-stack bus booking application from design to deployment.
- Developed reusable React.js components, streamlining UI development and improving code maintainability across the app.
- Built fully responsive pages with Bootstrap and CSS3, ensuring consistent experience across desktop and mobile devices.
- Integrated REST APIs using the Fetch API to support user authentication, bus search, and seat booking workflows.
- Used Git and GitHub for version control, branching, and team collaboration throughout the project lifecycle.

#### Handwritten Text Recognition (HTR) System — Graduation Project

Sep 2023 – Jun 2024

Python · Machine Learning · OpenCV | Team Project | [GitHub Repository](#)

- Co-developed an offline handwriting recognition engine in Python, enabling accurate text extraction from scanned image inputs without cloud dependency.
- Designed an OpenCV-based image preprocessing pipeline (noise reduction, contrast enhancement) that improved input clarity prior to model inference.
- Trained and evaluated machine learning classification models, iterating on feature selection to increase character recognition accuracy.

#### Personal Portfolio Website

Jun 2026 – Jul 2026

React.js · Tailwind CSS · Vite · Git | [GitHub Repository](#) | [Live Demo](#)

- Designed and developed a fully responsive personal portfolio using React.js and Tailwind CSS.
- Showcases projects, technical skills, and contact information in a clean, mobile-first layout.
- Deployed via Vercel with an automated build-and-deploy pipeline triggered on every Git push.

### EXPERIENCE

#### Frontend Developer — Personal & Team Projects

Sep 2020 – Present

Helwan University, Cairo, Egypt

- Developed multiple responsive React.js applications independently and in small teams, applying component-based architecture and modern JavaScript practices.
- Collaborated using Git/GitHub with version control best practices, including branching and code review, across all academic projects.
- Applied core software engineering and database management principles from coursework to structure and debug full-stack applications.
