Detail-oriented **Computer Science & Information Systems graduate** specializing in **Frontend Web Development**. Proficient in building responsive and interactive user interfaces using **React.js**, **JavaScript (ES6+)**, and modern CSS frameworks. Developed a solid understanding of core software engineering principles, **Data Structures**, **Algorithms**, and **Docker containerization** through comprehensive academic development projects. Proven capability to collaborate effectively in team environments to deliver clean and maintainable code.

TECHNICAL SKILLS

Frontend Stack:	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design, Component-Based Development
Backend & DB:	Node.js, Express.js, SQL, RESTful APIs Integration, Database Concepts
Tools & DevOps:	Docker, Git, GitHub, Version Control, VS Code
Core Engineering:	Data Structures, Algorithms, Object-Oriented Programming (OOP), Problem Solving (CS50), Python, Machine Learning Foundations

PROJECTS (ACADEMIC TEAM ENVIRONMENT)

Bus Booking Web Application	React.js, Node.js, REST APIs
-----------------------------	------------------------------

Repository: <https://github.com/MohamedYHassan/ReactApp.git>

- Engineered reusable React.js client-side components to ensure structural codebase modularity and maintainability.
- Developed fully responsive UI layouts utilizing CSS3 and Bootstrap frameworks, delivering cross-device compatibility across booking interfaces.
- Integrated secure asynchronous Fetch API workflows with a Node.js backend to handle dynamic data queries and user authentication sessions.

Handwritten Text Recognition (HTR) System — Graduation Project	Python, Machine Learning, OpenCV
--	----------------------------------

Repository: <https://github.com/MohamedYHassan/A-Handwritten-Text-Recognition-System.git>

- Co-developed an offline text recognition engine using Python to accurately process text image assets.
- Designed image preprocessing pipelines using OpenCV, implementing noise reduction and contrast enhancement techniques to optimize structural clarity before model ingestion.
- Contributed to training and evaluating underlying Machine Learning feature classification models to improve character recognition accuracy.

Microservices E-Commerce Infrastructure	Docker, Containerization
---	--------------------------

- Configured a decoupled multi-service deployment infrastructure by structuring segregated application runtime parameters.
- Authored customized Dockerfiles and managed container configurations to ensure clean, isolated development environment workflows.

EDUCATION

Bachelor of Computer Science and Information Systems	Sep 2020 – Jun 2024
--	---------------------

Helwan University, Faculty of Computer Science & Information Systems, Cairo, Egypt

- Academic Performance:** Cumulative GPA: 3.01 / 4.00 (Overall Grade: Very Good equivalent)
- Core Coursework:** Software Engineering, Database Management Systems, Advanced Web Development, Data Structures & Algorithms, Operating Systems.

PROFESSIONAL WORK EXPERIENCE

Customer Service Representative 2022 – 2022

Telecommunications / Service Sector, Cairo, Egypt

- Handled customer queries and standard troubleshooting requests, maintaining high service delivery standards.

Accountant 2023 – 2023

Logistics & Shipping Company, Cairo, Egypt

- Managed daily transactional ledgers, financial reports, and record tracking to support logistical operation audits.

LANGUAGES & CORE PROFICIENCIES

- Arabic (Native).
- English (Professional Working Proficiency - B2 Level).
