

ESLAM AYMAN

Frontend Web Developer | React.js Specialist

Cairo, Egypt | 01068078245 | eslamayman2412@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Frontend Web Developer with a Bachelor's degree in Computer Science and hands-on project experience building responsive, production-quality interfaces with React.js, JavaScript (ES6+), and modern CSS frameworks. Skilled in translating designs into reusable, maintainable component architectures and integrating REST APIs for dynamic, data-driven applications. Strong foundation in software engineering, data structures, algorithms, and RESTful application development, with hands-on experience delivering scalable frontend applications and collaborative software projects.

EDUCATION

Bachelor of Computer Science

Sep 2020 – May 2024

Helwan University, Faculty of Computer Science & Information Systems, Cairo, Egypt

- Cumulative GPA:** 3.01 / 4.00 (Very Good)
- Relevant Coursework:** Software Engineering, Database Management Systems, Advanced Web Development, Data Structures & Algorithms, Operating Systems

Languages: Arabic (Native), English (Professional Working Proficiency – B2).

SKILLS

- Languages:** JavaScript (ES6+), HTML5, CSS3, SQL, Python.
- Frontend:** React.js, Vite, Tailwind CSS, Bootstrap, Responsive Design, Mobile-First Design, React Hooks, Context API, Fetch API.
- Backend & APIs:** REST APIs, Axios, Node.js (Basic), Express.js (Basic).
- Tools:** Git, GitHub, Docker, Vercel, Visual Studio Code.
- Concepts:** OOP, Data Structures & Algorithms, Software Engineering, Problem Solving.

PROJECTS

Bus Booking Web Application

Feb 2024 – May 2024

React.js · Node.js · REST APIs | Team Project | [GitHub](#)

- Developed frontend features for a full-stack bus booking application in a collaborative team environment.
- Built reusable React.js components to improve maintainability and scalability.
- Developed responsive UIs using React.js, Bootstrap, and CSS3.
- Integrated REST APIs for authentication, bus search, and seat booking.
- Used Git and GitHub for version control and team collaboration.

Handwritten Text Recognition (HTR) System — Graduation Project

Sep 2023 – Jun 2024

Python · Machine Learning · OpenCV | Team Project | [GitHub](#)

- Developed an offline handwriting recognition system using CNN, 2BLSTM, CTC, and SymSpell.
- Designed an OpenCV-based image preprocessing pipeline with image normalization, noise reduction, contrast enhancement, and data augmentation to improve input quality before inference.
- Trained HTR models on the IAM dataset using CTC loss and Beam Search.
- Achieved 7% Character Error Rate (CER) and 18% Word Error Rate (WER) on handwritten text-line recognition, and 9% CER and 21% WER on isolated word recognition.
- Benchmarked the proposed model against state-of-the-art approaches, achieving competitive recognition performance on the IAM dataset.

Personal Portfolio Website

Jun 2026 – Jul 2026

React.js · Tailwind CSS · Vite · Git | [GitHub](#) | [Live](#)

- Designed and developed a responsive personal portfolio using React.js and Tailwind CSS.
- Implemented dark/light mode, responsive layouts, and smooth animations to deliver a modern, mobile-first user experience.
- Deployed the application on Vercel with automated CI/CD triggered by Git pushes.

EXPERIENCE

Frontend Developer | Personal Projects

Sep 2020 – Present

- Developed multiple responsive React.js applications independently and in small teams, applying component-based architecture and modern JavaScript practices.
- Collaborated using Git/GitHub with version control best practices, including branching and code review, across all academic projects.
- Applied core software engineering and database management principles from coursework to structure and debug full-stack applications.
